Reasons for Allowance

The following is an examiner's statement of reasons for allowance: applicant's amendments and arguments are deemed to overcome the rejections of record and distinguish the claims over the prior art. With regard to the Drawing Objections and the 35 USC 112, first paragraph rejections, applicant's arguments are deemed persuasive. The examiner had misconstrued the term "side firing delivery fiber optic" to mean a fiber optic that directed radiation in a direction perpendicular to the tip of the fiber optic. Such a definition is commonly used in the art and fairly shown in the art of record (e.g. Vassiliadis et al, US Pat No. 5,129,895). However, applicant has clearly shown the use of side-firing optical fibers whereby energy is fired sideways to the longitudinal axis by bending the fiber optic as shown in applicant's Figures 5b and 5c. The examiner has further discovered other art references that provide a similar definition of a side-firing fiber optic. See, for example, Bruce, US Patent No. 5,416,878. As such, applicant's specification and drawings are deemed to contain proper support for the claimed invention, and applicant's amendments to the specification to call the fiber in Figures 5b and 5c a "side-firing" fiber is deemed a clarification of the record for which there is clear support. With regard to the prior art of record, there is no clear teaching of the particular endoprobe that includes a side-firing, extendable laser fiber with the particular shielding structure as set forth in the claims. McIntyre et al (5,549,601) disclose a device that has an optical fiber that can be extended at an angle. However, McIntyre et al fail to disclose the particular shielding structure, or the trunk optical fiber connection and the source providing bursts of laser pulses. Previously cited Vassiliadis et al discloses a

typical known side-firing laser fiber, but fails to disclose a shielding structure at the end of the probe since the optical energy is directed in a perpendicular manner. Vassiliadis et al also fail to disclose an extended firing portion for the optical fiber as now set forth in claim 19.

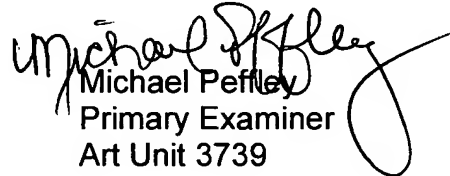

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
